Voicework in Music Therapy: Research and Practice

Voicework in Music Therapy: Research and Practice

The voice is a powerful instrument in music therapy practice and this anthology of voicework techniques explores everything the practitioner needs to know in order to bring about successful interventions across a broad range of client groups. Compiling a wealth of international evidence-based practice, this book offers detailed descriptions of clinical methods that are grounded in research. Chapters are grouped into structured and unstructured approaches for use with clients across the lifespan. Clinical populations covered include neonates; children with autism or developmental disability, individuals with neurological damage including stroke, Parkinson's disease patients, traumatic brain injury, and spinal injury; people with mental illness; medical conditions such as asthma and pain; oncology and palliative care; and, aged care and dementia. This book will be an invaluable resource for any music therapy student or practitioner looking to explore the use of voicework in music therapy.
