Based on ongoing research conducted by investigative teams at the University of Iowa, **NOC and NIC Linkages to NANDA-I and Clinical Conditions: Supporting Critical Thinking and Quality Care, 3rd Edition** is the only book on the market that provides linkages between the three standardized languages recognized by the American Nurses Organization (NOC, NIC, and all of the 2009-2010 NANDA-I approved nursing diagnoses). Its user-friendly, tabular format and real-world case studies make it the perfect tool to help you develop effective care plans for your patients. This edition features a new chapter on clinical decision making, a new chapter on the use of NNN in information systems, more concise intervention listings that identify major and suggested interventions, and approximately 20 new linkages to common, high-cost medical diagnoses.

- **Linkages between the three standardized languages recognized by the American Nurses Organization:** NANDA-I, Nursing Interventions Classification (NIC), and Nursing Outcomes Classification (NOC) help you select the most effective care plans for patients and allow institutions to track and quantify nursing care.
- **Tabular format** allows you to quickly retrieve information.
- **Case studies with nursing care plans** demonstrate the practical, real-life application of linkages.
- **Definitions of all NANDA-I, NOC, and NIC labels** provide comprehensive coverage of the standardized languages.
- **Serves as an excellent companion** to *Nursing Outcomes Classification (NOC), 4th Edition* and *Nursing Interventions Classification (NIC), 5th Edition*.
- **NEW! Added linkages to common medical diagnoses** help support clinical reasoning, improve quality, and build the evidence needed to enhance nursing care.
  - Includes 15-20 high-frequency, high-cost medical diagnoses that are commonly experienced by patients across the life span.
  - Examples include Congestive Heart Failure, Chronic Obstructive Pulmonary Disease (COPD), Total Joint Replacement, and Asthma.
- **NEW! Treatment of Intervention content** makes information easier to locate by listing interventions as *Major Interventions* and *Suggested Interventions*.
- **Two NEW chapters** discuss the use of linkages for clinical reasoning and quality improvement and the use

of NNN in computerized information systems.

- **NEW! Information associated with the risk for nursing diagnosis** is contained on a single page for quick and easy reference.
