Curve and Surface Reconstruction: Algorithms with Mathematical Analysis (Cambridge Monographs on Applied and Computational Mathematics)

Tamal K. Dey

Curve and Surface Reconstruction: Algorithms with Mathematical Analysis (Cambridge Monographs on Applied and Computational Mathematics)

Tamal K. Dey

Curve and Surface Reconstruction: Algorithms with Mathematical Analysis (Cambridge Monographs on Applied and Computational Mathematics) Tamal K. Dey
Many applications in science and engineering require a digital model of a real physical object. Advanced scanning technology has made it possible to scan such objects and generate point samples on their boundaries. This book, first published in 2007, shows how to compute a digital model from this point sample. After developing the basics of sampling theory and its connections to various geometric and topological properties, the author describes a suite of algorithms that have been designed for the reconstruction problem, including algorithms for surface reconstruction from dense samples, from samples that are not adequately dense and from noisy samples. Voronoi- and Delaunay-based techniques, implicit surface-based methods and Morse theory-based methods are covered. Scientists and engineers working in drug design, medical imaging, CAD, GIS, and many other areas will benefit from this first book on the subject.

From reader reviews:

Gina Melton:

Have you spare time to get a day? What do you do when you have far more or little spare time? That's why, you can choose the suitable activity to get spend your time. Any person spent their spare time to take a move, shopping, or went to typically the Mall. How about open or even read a book entitled Curve and Surface Reconstruction: Algorithms with Mathematical Analysis (Cambridge Monographs on Applied and Computational Mathematics)? Maybe it is to be best activity for you. You realize beside you can spend your time using your favorite's book, you can wiser than before. Do you agree with it is opinion or you have some other opinion?

Andria Miguel:

This book untitled Curve and Surface Reconstruction: Algorithms with Mathematical Analysis (Cambridge Monographs on Applied and Computational Mathematics) to be one of several books this best seller in this year, here is because when you read this guide you can get a lot of benefit into it. You will easily to buy this kind of book in the book store or you can order it via online. The publisher of this book sells the e-book too. It makes you quickly to read this book, because you can read this book in your Smartphone. So there is no reason for you to past this guide from your list.

Ward Beaver:

The book untitled Curve and Surface Reconstruction: Algorithms with Mathematical Analysis (Cambridge Monographs on Applied and Computational Mathematics) contain a lot of information on the item. The writer explains the woman idea with easy means. The language is very clear to see all the people, so do certainly not worry, you can easy to read the idea. The book was published by famous author. The author provides you in the new period of literary works. You can easily read this book because you can keep reading your smart phone, or gadget, so you can read the book inside anywhere and anytime. In a situation you wish to purchase the e-book, you can wide open their official web-site and order it. Have a nice learn.

Jose Said:

A lot of guide has printed but it is different. You can get it by web on social media. You can choose the top book for you, science, comedy, novel, or whatever by searching from it. It is known as of book Curve and Surface Reconstruction: Algorithms with Mathematical Analysis (Cambridge Monographs on Applied and Computational Mathematics). You can add your knowledge by it. Without departing the printed book, it could possibly add your knowledge and make a person happier to read. It is most important that, you must aware about book. It can bring you from one place to other place.
