**Nuclear Medicine and PET/CT Technology and Techniques, 6e** Paul E. Christian BS CNMT PET FSNMITS, Kristen M. Waterstram-Rich MS CNMT NCT FSNMITS

For more than two decades, this text has succinctly presented the procedures and technologies related to an ever-changing specialty. This 6th edition continues that tradition by providing a general update of all chapters, a new chapter on CT physics and instrumentation, and a revised focus to the increasingly important PET/CT systems. All aspects of nuclear medicine are explored, with a focus on pertinent anatomy and physiology and a discussion of each procedure in relation to the specific use of radiopharmaceuticals and instruments required.

- Foundation chapters cover basic math, statistics, physics instrumentation, computers, lab science, radiochemistry and pharmacology, allowing the user to understand how and why procedures are performed.
- High-profile editors and contributors come from a variety of educational and clinical settings, making this an authoritative and comprehensive resource.
- In-depth procedure discussions provide practical information relevant to clinical practice.
- Accessible writing style and approach to basic science subjects makes topics understandable, progressing from fundamentals to more complex concepts.
- A glossary provides definitions of specialized terminology and all important concepts.
- The focus changes from PET to combined PET/CT, with two chapters covering this topic in detail.
- New CT Physics and Instrumentation chapter provides the fundamentals of PET/CT studies.
- Significantly rewritten chapters include Radiation Safety in Nuclear Medicine, Skeletal System, and Inflammatory/Tumor Imaging and Therapy.
- Color insert is expanded to 8 pages to include clear, full-color PET/CT scans.
- 40 practice problems are included in the chapter on math and statistics, twice as many as before, with answers in the back of the book.
- Reader-friendly features include key terms, chapter outlines, and learning objectives. Suggested readings are also included throughout the book.
- A reference table of radionuclides used in nuclear medicine and PET is added to the appendix.

**From reader reviews:**

**Robert Gibson:**

Nowadays reading books be a little more than want or need but also work as a life style. This reading practice give you lot of advantages. Associate programs you got of course the knowledge the rest of the information inside the book this improve your knowledge and information. The details you get based on what kind of reserve you read, if you want send more knowledge just go with knowledge books but if you want feel happy read one using theme for entertaining such as comic or novel. Typically the Nuclear Medicine and PET/CT Technology and Techniques, 6e is kind of publication which is giving the reader unforeseen experience.

**Julia Hanson:**

Reading a guide can be one of a lot of exercise that everyone in the world adores. Do you like reading book therefore. There are a lot of reasons why people fantastic. First reading a e-book will give you a lot of new details. When you read a publication you will get new information simply because book is one of many ways to share the information or perhaps their idea. Second, reading through a book will make you actually more imaginative. When you studying a book especially fiction book the author will bring you to imagine the story how the personas do it anything. Third, you could share your knowledge to other people. When you read this Nuclear Medicine and PET/CT Technology and Techniques, 6e, you can tells your family, friends as well as soon about yours e-book. Your knowledge can inspire others, make them reading a book.

**Neil Calvert:**

This Nuclear Medicine and PET/CT Technology and Techniques, 6e is great reserve for you because the content and that is full of information for you who have always deal with world and have to make decision every minute. This kind of book reveal it facts accurately using great organize word or we can state no rambling sentences inside it. So if you are read it hurriedly you can have whole facts in it. Doesn't mean it only offers you straight forward sentences but tough core information with splendid delivering sentences. Having Nuclear Medicine and PET/CT Technology and Techniques, 6e in your hand like keeping the world in your arm, data in it is not ridiculous one particular. We can say that no publication that offer you world within ten or fifteen moment right but this e-book already do that. So , this can be good reading book. Hello Mr. and Mrs. stressful do you still doubt that will?

**Hazel Fletcher:**

This Nuclear Medicine and PET/CT Technology and Techniques, 6e is completely new way for you who has fascination to look for some information because it relief your hunger of knowledge. Getting deeper you in it getting knowledge more you know or else you who still having small amount of digest in reading this Nuclear Medicine and PET/CT Technology and Techniques, 6e can be the light food for you personally because the information inside this book is easy to get through anyone. These books develop itself in the

form which can be reachable by anyone, yeah I mean in the e-book application form. People who think that in publication form make them feel tired even dizzy this publication is the answer. So there is no in reading a book especially this one. You can find actually looking for. It should be here for a person. So , don't miss it! Just read this e-book type for your better life and knowledge.
