Regulating Next Generation Agri-Food Biotechnologies: Lessons from European, North American and Asian Experiences (Genetics and Society)

Regulating Next Generation Agri-Food Biotechnologies: Lessons from European, North American and Asian Experiences (Genetics and Society)

Agri-food bio-technology policy and regulation is transitioning from an early period focused on genetic engineering technologies to 'next-generation' rules and regulatory processes linked to challenges originating in a wide variety of new technological processes and applications. Can lessons learned from past and current regulatory oversights of agricultural biotechnology – and other high-technology sectors – help us address new and emerging regulatory challenges in the agri-food genetics sector?

The expert contributors in this volume discuss the experiences of a wide range of North American, European and Asian countries with high technology regulation to address four key questions related to the past and future development of agri-food genomics regulation across the globe.

- how unique is agri-food biotechnology regulation, and how can it be evaluated using the existing tools of regulatory analysis developed in examinations of other sectors?
- is a 'government to governance' model of regulatory regime development found in many other sectors relevant in this rapidly evolving sphere of activity?
- is a stages model of regulatory regime development accurate? And, if so, at which stage are we currently positioned in the regulation of agri-food genomics products and technologies?
- what drives movement between stages in different countries and sectors? In assessing such drivers, what are the key links between sectoral (meso) developments and more general macro and micro developments such as international relations and administrative behaviour?

By updating, extending and challenging earlier empirical and theoretical social science perspectives on agricultural bio-technological regulation, this volume helps to inform future policy formulation. It will be of interest to practitioners and students of biotechnology, agriculture, and science and technology policy, and regulatory processes more generally.

From reader reviews:

Eric McDonald:

Playing with family in a park, coming to see the sea world or hanging out with pals is thing that usually you might have done when you have spare time, subsequently why you don't try issue that really opposite from that. One particular activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of information. Even you love Regulating Next Generation Agri-Food Biotechnologies: Lessons from European, North American and Asian Experiences (Genetics and Society), you can enjoy both. It is very good combination right, you still desire to miss it? What kind of hang type is it? Oh come on its mind hangout men. What? Still don't obtain it, oh come on its called reading friends.

Jon Farris:

Many people spending their time period by playing outside along with friends, fun activity together with family or just watching TV all day long. You can have new activity to enjoy your whole day by reading through a book. Ugh, you think reading a book can really hard because you have to use the book everywhere? It ok you can have the e-book, bringing everywhere you want in your Mobile phone. Like Regulating Next Generation Agri-Food Biotechnologies: Lessons from European, North American and Asian Experiences (Genetics and Society) which is getting the e-book version. So , try out this book? Let's observe.

Dave Edwards:

Within this era which is the greater particular person or who has ability in doing something more are more valuable than other. Do you want to become one among it? It is just simple method to have that. What you are related is just spending your time almost no but quite enough to have a look at some books. On the list of books in the top checklist in your reading list is Regulating Next Generation Agri-Food Biotechnologies: Lessons from European, North American and Asian Experiences (Genetics and Society). This book which can be qualified as The Hungry Slopes can get you closer in turning out to be precious person. By looking upwards and review this guide you can get many advantages.

Nancy Brown:

What is your hobby? Have you heard this question when you got students? We believe that that problem was given by teacher on their students. Many kinds of hobby, Everyone has different hobby. So you know that little person such as reading or as studying become their hobby. You have to know that reading is very important along with book as to be the thing. Book is important thing to increase you knowledge, except your own personal teacher or lecturer. You find good news or update concerning something by book. Amount types of books that can you go onto be your object. One of them is niagra Regulating Next Generation Agri-Food Biotechnologies: Lessons from European, North American and Asian Experiences

(Genetics and Society).
