This book covers the exciting Post-WWII/Cold War Era of rapidly changing military technology. During this era quantum leaps were being made in missiles, computers, and electronics. This book documents the numerous proposals for incorporating these technologies into US battleships. The book is lavishly illustrated with full color painting of each proposal as it would have appeared. Scale line drawings are included of both the profile and deck plan of each conversion. There is also a fully illustrated section on USN missile development 1944-1965. This book is a must for anyone interested in military technology and US battleships and their conversion programs of the Cold War era.
