United Nations Development Programme and System (UNDP) (Global Institutions)

Stephen Browne

United Nations Development Programme and System (UNDP) (Global Institutions) Stephen Browne

This volume provides a short and accessible introduction to the organization that serves as the primary coordinator of the work of the UN system throughout the developing world –the United Nations Development Programme (UNDP). The book:

- traces the origins and evolution of UNDP, outlining how a central UN funding mechanism and field network developed into a more comprehensive development agency
- evaluates the UNDP's performance and results, both in its role as system coordinator and as a development organization in its own right
- considers the return of the UNDP to a more central role within the UN development system, in order to review the successive attempts at UN development system reform, the reasons for failure and the future possibilities for a more effective system with the UNDP at the centre.

Offering a clear, comprehensive overview and analysis of the organization, this work will be of great interest to students and scholars of development studies, international organizations and international relations.
