However, few therapists exclusively have clients who manifest only psychiatric or substance abuse symptoms. This book provides information and case examples concerning how to effectively manage a caseload composed of individuals with substance abuse, psychiatric, and co-occurring disorders. It presents strategies for providing comprehensive assessments for these individuals. Additionally, it describes how to provide effective case management as well as individual, group, and family treatment for individuals with multiple disorders and levels of function, and provides information on interacting effectively with the mental health and substance abuse recovery communities."

Tables, figures, and a generous portion of intriguing case descriptions will help you apply the information in this useful volume to your own work.
