Duy Trong Ngo, Tho Le-Ngoc

Architectures of Small-Cell Networks and Interference Management (SpringerBriefs in Computer Science) Duy Trong Ngo, Tho Le-Ngoc

This Springer Brief presents the architectures of small-cell networks and recent advances in interference management. The key challenges and values of small cells are first introduced, followed by the reviews of various small-cell architectures and interference management techniques in both heterogeneous CDMA and heterogeneous OFDMA small-cell networks. New adaptive power control and dynamic spectrum access techniques are discussed to promote a harmonized coexistence of diverse network entities in both 3G and 4G small-cell networks. Analytically devised from optimization and game theories, autonomous solutions are shown to effectively manage the intra-tier and cross-tier interferences in small cells. Informative and practical, this Springer Brief is designed for researchers and professionals working in networking and resource management. The content is also valuable for advanced-level students interested in network communications and power allocation.

From reader reviews:

Nathan Wilson:

Nowadays reading books be a little more than want or need but also become a life style. This reading routine give you lot of advantages. Associate programs you got of course the knowledge the actual information inside the book this improve your knowledge and information. The details you get based on what kind of e-book you read, if you want drive more knowledge just go with schooling books but if you want really feel happy read one with theme for entertaining for example comic or novel. Often the Architectures of Small-Cell Networks and Interference Management (SpringerBriefs in Computer Science) is kind of publication which is giving the reader unpredictable experience.

Christina Lazarus:

Why? Because this Architectures of Small-Cell Networks and Interference Management (SpringerBriefs in Computer Science) is an unordinary book that the inside of the e-book waiting for you to snap the idea but latter it will jolt you with the secret the idea inside. Reading this book close to it was fantastic author who write the book in such amazing way makes the content inside of easier to understand, entertaining technique but still convey the meaning totally. So , it is good for you because of not hesitating having this any more or you going to regret it. This amazing book will give you a lot of rewards than the other book get such as help improving your expertise and your critical thinking approach. So , still want to hesitate having that book? If I ended up you I will go to the reserve store hurriedly.

Armando Mosley:

Playing with family within a park, coming to see the marine world or hanging out with buddies is thing that usually you could have done when you have spare time, subsequently why you don't try issue that really opposite from that. 1 activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love Architectures of Small-Cell Networks and Interference Management (SpringerBriefs in Computer Science), you can enjoy both. It is fine combination right, you still wish to miss it? What kind of hangout type is it? Oh come on its mind hangout men. What? Still don't understand it, oh come on its known as reading friends.

Doyle Swoope:

Is it an individual who having spare time subsequently spend it whole day through watching television programs or just laying on the bed? Do you need something new? This Architectures of Small-Cell Networks and Interference Management (SpringerBriefs in Computer Science) can be the response, oh how comes? A book you know. You are consequently out of date, spending your extra time by reading in this brand-new era is common not a geek activity. So what these ebooks have than the others?
